

INNO-EXOMA[®] EXO-SKIN

Exosome-like cosmetic regenerative complex

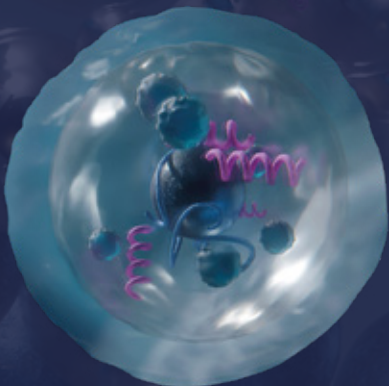

INNOAESTHETICS

UNDERSTANDING EXOSOMES

Exosomes are microscopic vesicles released by human cells, crucial for cell-to-cell communication and several physiological processes. **They treat the tissues from inside your cells, offering an unparalleled solution for tissue regeneration.**

INNOAESTHETICS EXOSOME-LIKE MOLECULE

INNOAESTHETICS has developed a synthetic exosome that emulates the biological capabilities of human cell-derived exosomes, enhancing:

- Collagen production
- Hyaluronic Acid formation
- Tissue regeneration
- Skin's self-healing capabilities
- Antioxidant action

NARBEX™ BIOTECHNOLOGY

Our **NARBEX™** (Non-Animal Regenerative Bioengineering Exosome) technology enables the replication of the active part of the proteins found in cell-derived exosomes.

INNO-EXOMA® EXO-SKIN

The Ultimate Skin Regenerative Complex

The versatility of INNO-EXOMA® EXO-SKIN allows to enhance skin health and appearance, addressing your specific needs. It suits all skin types, preventing signs of aging and effectively improving most skin issues.

1 vial with lyophilized product
1 ampoule with saline solution

INDICATIONS

- **Skin aging:** Prevents and reverses all signs of skin aging.
- **Skin conditions:** Acne, oily and dry skin, uneven pigmentation, couperose, etc.
- **Hair loss:** Improves the scalp microenvironment and regenerates hair bulbs.

INTEGRAL SOLUTION

Clinically Proven Long-Lasting Results

- 96% enhanced moisture
- 84% wrinkle reduction
- 92% firmer skin
- 88% even skin tone
- 82% less imperfections

Clinical study carried out on January 2024.
